■ **MOSSMAN WHISKEY BOTTLE TM J. MOSSMAN / Medco Atlantic Inc.**

The Mossman 750ml bottle was designed exclusively for J. Mossman Scotch whisky. It was named after Sir Jonathan Mossman, a jeweler to Mary, Queen of Scots, who lived in Edinburgh, Scotland, and designed the crown of Scotland in 1540, giving it a new look that has survived to this day. This explains the bottle's appearance and monumental, elegant shape, which, combined with the crown and thick base, appears quite pompous. The high base (45 mm) seems to elevate this product to a pedestal, emphasizing and enhancing its value. The bottle is made of high-quality Extra Flint glass. The product is decorated with three-dimensional gold and silver embossing and screen printing, framed by three-dimensional metal labels. Available for whisky aged 12, 15, and 18 years. Rightfully taking its place among premium bottles, this 38-year-old whiskey is bottled in a handcrafted crystal bottle inlaid with 24-karat natural gold.

Supplied exclusively to Medko & Atlantik (USA). All rights reserved.

PRODUCTION OF GLASS MOULDS

Moulds are key to realising your ideas in glass

PRODUCTION OF MOLD SETS FOR BOTTLE MANUFACTURING

EuroGlassColor provides high-quality mold manufacturing services for glass bottles of any complexity. We utilize state-of-the-art equipment and employ highly qualified specialists. We offer a full cycle of mold kit production for the BB, PB, and NNPB glass container manufacturing processes. We also manufacture NNPB tooling, plungers, and bronze neck rings. We also manufacture holders for finishing and roughing molds, universal adapters, and release grips with graphite inserts. Our facility is equipped with the latest high-precision machining equipment, and our production capacity allows us to produce up to 300 mold kits per month. Our work is based on ISO 9001:2015 quality guidelines. We continually invest in research and development, as well as modern manufacturing technologies, such as:

- Induction heat treatment followed by metallization using plasma spraying;
 - "Protec" vacuum melting technology;
 - Full-profile coating;
 - In-house design department: design using CAD and CAM systems (2D and 3D);
 - State-of-the-art multi-axis machining centers with automatic workpiece transfer and two chucks for turning and milling.
- In the production of finishing and roughing molds, we use several types of cast iron from different manufacturers (France, Italy, Slovenia), differing in chemical composition, structure, and mechanical properties. Any cast iron can be used upon request. Our regular customers include major European, Russian, Ukrainian, and Moldovan glass factories.
- We are ready to handle the entire process: from developing a glass product sketch to launching a serial production batch.
- Design development;
 - Product sketch and its approval with the customer;
 - Development of a working drawing and 3D model of the glass product;
 - Production of a solid-state mockup and further approval of the product's appearance with the customer;
 - Calculation of design documentation for the mold set;
 - Production and delivery of a test mold set to the factory;
 - Our specialists will be present during the mold set pilot run (if necessary);
 - Amendments to drawings and modifications to test molds for repeat testing;
 - Production of the main mold set, customs clearance, and delivery to the glass factory. Delivery times for mold sets: test mold sets from 20 days, full mold sets from 35 days.
